

POLYCARBONATE GLAZING CLEANING INSTRUCTIONS

Wash polycarbonate glazing panels with a mild soap or detergent and plenty of lukewarm water. Use a clean soft cloth applying only light pressure. Rinse with clean water and dry blotting with a damp cloth or chamois. Grease, oil or tar may be removed with a high quality grade of hexane, naphtha, or kerosene. These solvents may be obtained at a paint or hardware store and should be used in accordance with the manufacturer's recommendations.

- ◆ **Do Not:** *Use window cleaning sprays. Alcohol, or solvents such as acetone, gasoline, benzene, carbon tetrachloride or lacquer thinner. These types of agents will destroy polycarbonate glazing*
- ◆ **Do Not:** *Clean polycarbonate glazing in the direct sunlight or when the glazing is hot.*
- ◆ **Do Not:** *Use any abrasive cleaners or scouring pads.*
- ◆ **Do Not:** *Wipe glazing when dry. This will scratch the glazing surface.*
- ◆ **Do Not:** *Use paper towels or any paper products to clean polycarbonate glazing.*
